

SCROLLING SIGNS

Mountain Shelter Solutions produces a wide range of attention grabbing scrolling signs. Our uniquely designed display products are all constructed of non-rusting aluminum extrusions. All of our displays are sealed for indoor or outdoor applications. Inside each box we place the most reliable components that are available on the market today. This allows us to provide our customers with a very functional product that is virtually maintenance free.

Consumers walk by static advertisements everyday without ever noticing the content. Study after study has proven that motion is the most effective attention-getter in advertising. With this in mind, savvy retailers and business owners across North America, insist on giving preferential placement to motion displays because of their proven ability to increase both retailer and product awareness, both key factors that will therefore lead to increased sales.

Our *Made You Look*, scrolling message displays are remarkable in that they help contribute towards the consumer's overall product recall. Deliver your message, show your special product offerings while your customers are standing in your line-ups, draw potential clients into your establishment where a very high percentage will make unplanned purchases.

This scrolling sign is an innovative way to continuously scroll through up to 32 different images, allowing you to set the pause time before it scrolls to the next image. Bright, vibrant, high resolution back-lit advertisements, displayed in full, vivid color, coupled with the amazing effects of motion, will soon make you wonder what you ever did without them!

How do you want to present your advertisements? On a wall, a counter top, on a pedestal, in a mall directory or hanging from the ceiling, we have a display that will fit the bill. Our displays are available in a wide range of colors and finishes that will match your decor.

All of our *Made You Look*, displays are equipped with state of the art motors, control and sensor systems, engineered to provide you with unprecedented, long term dependable operation. **Want a custom look?** Call our design team today and turn your vision into reality.
